Slides Notes

Vlogging could be described as the activity or practice of posting short videos to or maintaining a vlog online (Oxford Language). Video blogs, or vlogs, are an increasingly popular way for content creators, people who share some of their interest through videos, images or text, named contents, to share their experiences and opinions. When vlogs are published to major platforms like YouTube or Instagram, they can build a fan group following over time and potentially even earn income through advertising partnerships (Aifobe).

Certain slides contain notes! Remember to click the button to check if there is any additional text accompanying the slide.

On the right side of the presentation, you'll find a preview of the slides included in the lesson. You can navigate from one slide to another by clicking on the slide you wish to view.

This button allows you to move to the next slide.

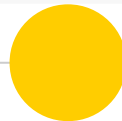

# The badges

- In this section, you'll discover "Badges" designed to boost learning enjoyment and engagement. These badges serve as recognition for achievements and skill acquisition attained through various learning experiences. You can obtain them by completing quizzes or interactive exercise.
- To view a summary of the badges you've earned, simply access your "Profile" by clicking on the circle with your initial located at the top right of the screen.
